

Health Research Development Program

By Elsevier Health

Date: 21st April 2026

Organized by:

Central Library and Research Administration Cell

Rajendra Institute of Medical Sciences, Ranchi, Jharkhand

Conducting and publishing health research is critical for students, researchers, and institutions. However, it is an arduous and time-consuming process. 60% of manuscripts are rejected by journals. Writing an original article in a manner that will likely be accepted by high impact journals for publishing can be challenging.

Elsevier offers the [Health Research Development Program](#), a customized program comprising interactive workshops and data services to support leading healthcare organizations in achieving their research goals.

This session will guide participants on how to select relevant research topics and suitable target journals while formulating clear research questions and appropriate methodologies. It will address common challenges such as misalignment between topic, journal scope, and study design. The session aims to equip participants with practical strategies to improve research quality, clarity, and publication success.

Workshop: Identifying the Right Topic, Journal, and Framing the Research Question & Methodology

Date & Time: 21st Apr 2026, Tuesday, 02:00 PM - 05:00 PM IST
