

Conflict of Interest – Declaration

Rajendra Institute of Medical Sciences, Ranchi

Tobacco is one of the most dangerous substance and is risk factor for various diseases. Tobacco is considered as a gateway drug and the most powerful addictive substances. Global evidence suggests that tobacco use is the leading cause of premature mortality. It prevents individuals, families, communities, and nations from achieving their fullest potential and development goals. The use of tobacco begins during the adolescence and experimentation during this period results in lifelong addiction. Hence, the tobacco industry approach is to target the most vulnerable period of adolescence. The Tobacco industry is among the most corrupt and venal in its practices. The World Health Organization and many leading public health organizations have warned that the tobacco industries would mislead governments and communities to achieve its profit by advancing their addictive products.

In this regard, Rajendra Institute of Medical Sciences (RIMS), Ranchi, strongly believes in promoting a healthy lifestyle for all by preventing tobacco use and addiction. Rajendra Institute of Medical Sciences(RIMS), Ranchi recognizes a fundamental conflict of interest between the tobacco industry and public health. To achieve these goals in our lifetime would require us to stay away from tobacco, alcohol, and other substances in any form,

- Rajendra Institute of Medical Sciences (RIMS), Ranchi, does not partner with any entity directly or indirectly related to and or/ engaged with the tobacco industry.
- We do not partner, invest in or get invest by organizations with inserts in the tobacco industry, or those who further the agenda of tobacco companies.
- We do not and shall not accept and / or endorse any direct or indirect support from the tobacco industry neither in cash and nor in kind.
