GeM Availability Report and Past Transaction Summary

GeM Availability Report and past transaction summary report is generated based on the product/service specification searched by the Buyer. The buyer can either create a manual report or bulk report in case of a large number of search strings. The specification may be modified appropriately for searching relevant categories on GeM. Buyer may navigate to GeM category page by clicking on the category link to view category specifications and products/services available in the category.

If the category is available in GeM but Buyer just needs to add a few more parameters to cover his requirement, Buyer can select matching product from market and then use the option of adding up to five more specifications parameters to the existing category / catalogue. This option would give Buyer the liberty to use normal bidding process and get better and structured / validated response from sellers already registered in a category.

In case, the required product/service category is not at all available on GeM, the buyer can create a custom catalog with required specifications and drawings and float a bid. A bunch bid can also be created with one or more custom items so created by the Buyer and also with existing category products. The competent authority approval is also required for floating custom catalog bid.

After generating GeM Availability Report, Custom Catalogue can be created by clicking at  and BOQ Based Bidding can be created by clicking at  under Actions.

Undertaking of Competent Authority is mandatory to create BoQ/Custom Bid. Please download standard format Document and upload it by clicking .

PROPRIETARY CERTIFICATE

This is to certify that the VARIANT II Hemoglobin Testing System (270-2000/270-2001) with its designs, see below:

1. The dual high pressure piston pump (with 2 reciprocating pistons) can only be used on Variant II Hemoglobin Testing System and its' the proprietary of Bio-Rad Laboratories, Inc. The dual high pressure piston pump is capable to run the test with primary tube sampling and automated bar code reading and positioning to achieve an efficient gradient for separation and aid in identification of Hemoglobin variants.
2. A designed large volume of buffer reservoir is intend for the capable to run a large number of samples in one run set up.
3. Two high pressure dual pistons reciprocating pumps that deliver and mix the buffers in a high pressure dynamic mixer is capable to achieve with a high accuracy and linear gradient, which allows a superior separation and aids in the identification of hemoglobin variants.
4. It is provided with online library available on internet with database of more than 300 molecularly confirmed Chromatograms and Clinical Data management software for bidirectional interfacing for real time viewing and analysis of samples for educational purposes.

Is the product of Bio-Rad Laboratories, Inc., 4000 Alfred Noble Drive, Hercules, California 94547 USA. Bio-Rad Laboratories, Inc. is the sole legal manufacturer and distributor of VARIANT II Hemoglobin Testing System and integral spare parts products worldwide.

Only Bio-Rad proprietary reagent kit VARIANT II Hemoglobin A1c Program(270-2101NU), VARIANT II β -Thalassemia Short Program, 500 (Cat no. 270-2154, VARIANT II Sample Vials 1.5mL (Cat No. 270-2149), VARIANT II β -Thalassemia Short Program HbA2/F Calibrator/Diluent Set (Cat No. 270-0083), VARIANT II microvial Adaptor (Cat No. 270-2016-10), and its required consumables must be used in conjunction with 270-2000/270-2001 VARIANT II Hemoglobin Testing System.
